Support Bulletin

Getting Started with Trimble Business Center (TBC) Monitoring

The Trimble® Business Center (TBC) Monitoring module leverages Trimble Connect and the Trimble Monitoring cloud service to store, query, manage, and report on monitoring data from TBC.

Requirements

To get started with the Trimble® Business Center (TBC) Monitoring module, a **TBC perpetual license or subscription** is needed. In addition, an active subscription to **Trimble Connect Business** (or Business Premium) is required to create more than one monitoring cloud project using TBC Monitoring. Trimble Connect and the Trimble Monitoring cloud service both require the workstation TBC is installed to have a **reliable internet connection**. For TBC users running within a network, certain ports and URLs are required to be accessible for TBC Monitoring to operate.

Perpetual license option

If a perpetual license is preferred, TBC v5.70 [Survey Intermediate edition](#) is the minimum edition required before adding on the Monitoring module.

Trimble Connect Business

Purchasing a perpetual Monitoring module license comes with one year of Trimble Connect Business. To retain Trimble Connect Business beyond the first year, a Connect Business subscription is available with an active Software Maintenance or Trimble Protected Plan applied to any of the following supported software:

- Trimble Business Center Monitoring module
- Trimble Access software
- Spectra Geospatial Origin software

A direct purchase of a Trimble Connect Business [subscription](#) is also an option.

surveypartners.trimble.com   **mgispartners.trimble.com**

Subscription license option

If a subscription is preferred, the following TBC [subscriptions](#) include the Monitoring module:
- Survey + Mapping
- Enterprise
- Mobile Mapping

Trimble Connect Business

Trimble Connect Business is included in all TBC subscription levels.

Compare license options

Compare both perpetual and subscription options with the offering equivalencies [bulletin](#). Contact [your local Trimble distributor](#) to [purchase](#) a license.

Ports and URLS

For TBC users running within a network, Table 1 below describes what ports, URLs, and the corresponding TBC Monitoring feature are required to be accessible when using the software.

Table 1: Ports and URLS relevant to TBC Monitoring features

Port	URL	TBC Monitoring Feature
443	https://identity.trimble.com	TiD authentication
443	https://*.connect.trimble.com	Trimble connect
443	https://*.t4dcloud.com	Monitoring cloud
443	https://fonts.googleapis.com	Google fonts (monitoring chart display)
443	https://fonts.gstatic.com	Google fonts (monitoring chart display)

Free trial

Gain [free access](#) to the full TBC Enterprise subscription license for 30 days and learn—through hands-on experience—all the features and workflow support that TBC has to offer. In addition to the 30-day trial, receive tips and tricks on getting started with TBC, success stories, and much more.
